WASHINGTON 25, D. C.

Loan and Power Use Memorandum 255

SUBJECT: DISPLAY 4-H ELECTRICAL WORK DURING
NATIONAL 4-H CLUB WEEK, MARCH 1-9

We are enclosing a poster which we think you will like to use as part of a window or office display during National 4-H Club Week, March 1 to 9, 1952.

Such a display highlighting 4-H activities will attract attention and express your organization's interest in the rural youth of the community. County farm and home extension agents will be glad to help by supplying additional materials needed to make a good display. Or they might assign the task of making the display to one of their 4-H clubs if you offer space for this use. See or write your local extension workers now and arrange to have an exhibit in place by Saturday, March 1, 1952.

If you have some home-made electrical equipment, this can be featured in your window. Or if any club members had rural electrification projects last year, you might ask if they will display their work. Some of the equipment a boy or girl has made or posters and equipment used in 4-H electrical demonstrations, combined with the poster mentioned above, would make a very effective exhibit.

The purpose of National 4-H Club Week is to give public recognition to 4-H club work, to help club members check on their work to date, to add new incentives, and to encourage more young people to enroll. This is an excellent time to secure interest in the 4-H rural electrification program as well as to express interest in other 4-H club programs.
